

MB-2XX accessories

Top flag

Item #0250-0020

In some extreme situations this flag is necessary to prevent lens flare. This flag comes in kit form, complete with friction hinge, and attaches to the mattebox via the accessory shoe. Only for the MB-200 (#0200-0200) *The MB-200 comes standard with this top flag.*

Side flag kit

Item #0340-0001

For best protection against lens flare we recommend using a side flag kit. This kit only fits on the MB-250 mattebox #0200-0250, and consists of an extra large top flag, two side flags and two friction hinges.

Filter frames

Filter frame 3"x3". Item #0310-0008

Filter frame 4"x4". Item #0310-0001

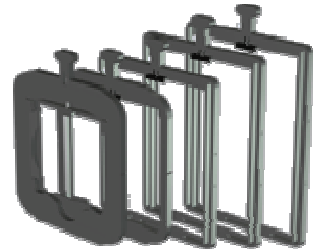

Filter frame 4"x6". Item #0310-0003

Filter frame 4"x5,65" (Panavision size). Item #0310-0004

Filter frame 4"x5". Item #0310-0007

Filter frame 4"x4" aluminum mkII Item #0310-0011

This filter frame is only necessary for the Sony HVR-Z1E / HDR-FX1 (HDV) cameras. Because of the low microphone of this camera, the original filter frames could not be rotated. That is why we have made this filter frame with shortened handgrip.

Note: 2pc. of 4"x4" filter frame are included in the standard mattebox kits.

Step down adapter rings

If a MB-200 or MB-250 mattebox is used as a clip-on (directly attached to the lens front), one of these following step down rings have to be used.

105mm to 95mm. Item #0250-0110, for cylindrical lens fronts.

105mm to 80mm. Item #0250-0120, for cylindrical lens fronts.

105mm to 93mm. Item #0250-0141, for cylindrical lens fronts.

105mm to 97mm. Item #0250-0142, for cylindrical lens fronts.

105mm to M37. Item #0250-0125, for inside threaded lens fronts.

105mm to M62. Item #0250-0135, for inside threaded lens fronts.

105mm to M58. Item #0250-0130, for inside threaded lens fronts.

105mm to M72. Item #0250-0140, for inside threaded lens fronts.

105mm to M82. Item #0250-0143, for inside threaded lens fronts.

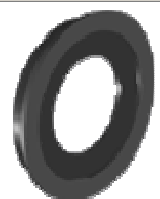

Care should be taken when using a clip-on mattebox to avoid damage to your equipment. We do not recommend the use of a clip-on mattebox in conjunction with a wide angle converter. Vocas is not responsible for any damage caused to your equipment through the use of a clip-on mattebox.

Flexible adapter ring kit

Item #0320-0010

Required if a mattebox is used on a rail support to fill the gap between the rear of the mattebox and the lens front. Six pieces of various diameter exchangeable soft rubber rings are included.

12mm rail support

Item #0350-0007

Ultra lightweight and compact rail support for mini DV cameras. With 12 mm. rails.

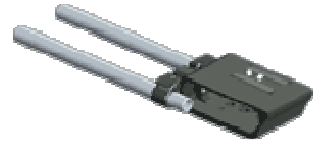

MBS-100, 15 mm rail support for DV cameras that feature its own shoulder brace.

For superior camera protection, optimal compatibility with Arri and other manufacturer's accessories such as follow focus.

Type "F" Item #0350-0008. Required for Canon XL-1(S) / XL-2 / XL-H1.

Type "H" Item #0350-0010. Required for JVC GY-HD100.

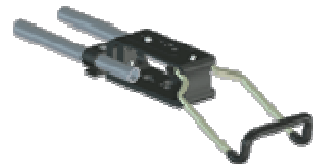

MBS-100 "Type G4" 15mm rail support, with integrated shoulder bracket

Item #0350-0012

Lightweight rail supports for Sony HVR-Z1E / HDR-FX1 (HDV) / PD-150 / PD-170 / HVR-V1E / HDRFX7 / Panasonic DVX-100(A) / HVX-200 / Canon XH-A1 / XH-G1.

15 mm lightweight support, for superior camera protection, optimal compatibility with Arri and other manufacturer's accessories such as follow focus.

Bars adapter DVMB MKII

Item #0250-0150

This adapter allows the matteboxes to be used on a rails support. Fits on supports with both 15 mm. and 12 mm rails.

12mm Extension Rods (2pc.)

Item #0250-0040

On some cameras with long lenses the standard 12 mm rails are too short. They can be extended 45 mm with these extenders.

Tripod spacer

Item #0250-0030

If a mattebox is attached to the camera with the 12 mm, or some 15 mm supports, it is impossible to attach the camera to some tripods (i.e. some Manfrotto and Vinten tripods).

For these tripods we have developed a "Tripod Spacer". This spacer raises the camera allowing it to attach to the tripod.
