

Manual Focus Controller accessories.

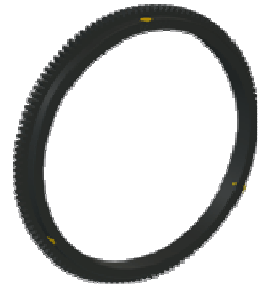

Gear rings.

For cameras without a toothed focus ring a gear ring is required.
This ring slips simply over the camera's focus ring.

Gear ring for Sony HVR-Z1U / HDR-FX1, tooth size M0,8. Item **#0500-0210**

Gear ring for Panasonic DVX-100, tooth size M0,8. Item **#0500-0220**

Gear ring for Panasonic HVX-200, tooth size M0,8. Item **#0500-0230**

Drive Gears.

This is the gear wheel which attaches to the follow focus unit.
Some lenses have different teeth sizes on the focus ring, therefore this gear has to be exchangeable.

Drive gear, tooth size M0.8, 36 teeth. Item **#0500-0100**

Drive gear, tooth size M0.6, 48 teeth. Item **#0500-0110**

Drive gear, tooth size M0.5, 60 teeth. Item **#0500-0120**

Drive gear Canon XL/H1 standard 20X lens, this drive gear does not have the normal shaped teeth, but the teeth are shaped to grip directly into the ribbed rubber focus ring of the lens. Therefore there is no gear ring required.
Item **#0500-0200**

Flex cable.

For remote operation, this cable can slip in the focus knob of the focus controller.

Flex cable 500MM long. Item **#0500-0400**

Star knob.

Some people desire a larger rotation knob or simply a lever to manipulate the rotation knob with more precision.

Star knob. Item **#0500-0500**

Spare scale.

Item **#0500-0300**
