

# *Director's monitor cage*

## **Introducing the new Director's monitor cage!**

Just imagine a Director's monitor cage that holds your 7" monitor firmly in place and allows the Director to view a shot exactly as the cameraman has meant it to be? Hassle free! Through the comfortable harness this bracket is a joy to use.

Using the optional adjustable and sturdy sunshade, reflections will not be affecting the picture at any time. Designed for maximum flexibility using the optional accessories like the spigot adapter and accessory plate.

Each Director's monitor cage includes a comfortable harness and the Vocas signature soft leather handgrips.

Please see the back of this brochure for all available accessories and kits.

## Director's monitor cage

The Director's monitor cage provides the monitor a stable base and includes a comfortable harness and the Vocas signature soft leather handgrips, all while protecting the monitor.

## Accessories:

### Spigot adapter

The spigot adapter provides compatibility with both a tripod (via a 1/4" and 3/8" thread hole) and a spigot (16 mm connection). The adapter also makes your monitor tilt slightly backwards when placed on a flat surface.

### Sunshade

For maximum reflection reduction, better contrast, colors and optimal true representation of the image, this water resistant, light proof sunshade is highly recommended. The height and width of the sunshade can be easily adjusted, depending on the dimensions of your 7" monitor. For monitors with a touch screen, the bottom section of the sunshade can be cut away to provide easy access to the screen.

### Accessory bracket

The accessory bracket offers the possibility to add a video receiver or battery plate. All possible hole patterns are added for attaching any battery plate, as well as multiple slots for attaching a video receiver using a 1/4" screw.

The accessory bracket can be mounted on several positions on the Director's monitor cage, up to a maximum of two accessory brackets.
