# MFC-6

The new Vocas studio follow focus MFC-6 has a very big advantage compared to our competition, a self-adjusting drive arm! A high quality follow focus still can work poorly because of improper calibration. With the new Vocas self-adjusting drive arm this problem belongs to the past!

The new Vocas studio follow focus MFC-6 has the same modular design as the Vocas follow focus MFC-2. Having the same modular design makes it possible to exchange accessories like the different knobs and drive gears!

## MFC-6 gear box 15 mm

There is one gear box available for the MFC-6, the heart of the MFC-6 system. Different knobs and one of the two available self adjusting drive arms can be mounted. The 15 mm Snap-on bracket allows you to snap the MFC-6 onto 15 mm bars or to one of the two adapter; 19 mm adapter 0500-1560 or 15 mm studio adapter 0500-1565.

**0500-1500**

## MFC-6 drive arms

Two different self adjusting drive arms are available for the studio follow focus MFC-6.

**MFC-6 drive arm 1:1 ratio.** This ratio works best with lenses that have a short focus throw, such as DSLR and ENG style lenses. **0500-1550**

**MFC-6 drive arm 1:2 ratio.** This ratio works best with lenses that have a long focus throw, such as CINE style lenses. **0500-1551**

## 15 mm to 19 mm Adapter low for snap-on

This 19 mm adapter allows the MFC-6 to be used with 19 mm rails.

The bracket positions the 15 mm rails lower than the industrial standard to allow the use of very large lenses with the MFC-6.

The single red tightening screw securely fastens the adapter to both 19 mm rails.

**0500-1560**

## 15 mm to 15 mm Studio adapter low for snap-on

This 15 mm studio adapter allows the MFC-6 to be used with 15 mm studio rails.

The bracket positions the normal 15 mm rails lower than the industrial standard to allow the use of very large lenses with the MFC-6.

The single red tightening screw securely fastens the adapter to both 15 mm studio rails.

**0500-1565**

## Drive gears
